	Linear Phasolver Measuring Engine	
STAT , IN		
STAT	of engineering made	
STAT	a presentation of the project to and me. It was well organized and they were knowledgeable of all aspects.	STAT
1	The most critical ep ascect is getting started on fabrication of a master driver pattern. This is delaying the job day by day and they are now 3 weeks behing the schedule submitted in the last progress report. The other parts of the program are going well. They believe they will have the drawings and the computer data to mann by next week.	STAT
STAT STAT	had been over to look at the to determine if it would be suitable for installing a measuring engine as a follow on to the present work. By this summer, they are confident they will be demonstrating an absolute measuring capability of plus or minus 1 micron ever 10 inches. It was point on the t	STAT
STAT	only the lower stage of theengine was rugged enough for their purpose. On the whole it did not appear that thewould be suitable without extensive modification and it might be better to start from scratch.	STAT
STAT	felt that further work should be aimed at producing a prototype machine which could be put on trial as a production item in shop.	OT 4 T
STAT	on trial as a production item in shop.  stated he would formulate (with Christs help)  the characteristics of such a machine and advise the vendor.	STAT
